

SCPnet

sustainable consumption and production network

Carol Wilson

SCPnet Co-ordinator

SCPnet Philosophy & Objectives

- Economic growth within environmental limits

through

- Embedding SCP in regional policy

SCPnet

sustainable consumption and production network

SCPnet Delivery Plan

- Effective use of better evidence in regional policy
- Consistent economic-environmental evidence
- Appropriate analytical and forecasting procedures

SCPnet Delivery Plan

- Knowledge sharing & effective networking
- Constructive communication & collaboration with national government
- Coordinated benchmarking & promotion of SCP performance

Questions for Today

- Are these still appropriate today?
- Are they still adequate to meet the changing needs of the regions?
- What can be learnt from experience to date?

SCPnet

sustainable consumption and production network

Questions for Today

How can the service be improved to address on-going & future needs?

Agenda for Tomorrow

- New procedures, models & tools
- Further define environmental limits
- Develop a vision for 2010 & beyond, post Sub-National Review

SCPnet

sustainable consumption and production network

Agenda for Tomorrow

- Bridge the divide between analysis & policy
- Support the development of the new Integrated Regional Strategy

Question for Tomorrow

- Could SCPnet be a model for the UK & Europe?
