

Friday

On Friday it slurped through the contents of 535 of those 500 ml bottles of mineral water, drizzled 645 litres of water from its 35 leaking taps, sloshed away 5 gallons every 15 minutes from each of its 5 urinals, and sprayed 15 litres of drinking water onto each of its 25 vegetable plots. And when it rained, all the rain flowed away down the drain.

That night the very hungry school had a stomach ache! It glared at all the very hungry houses. They were getting themselves ready for another busy weekend!
