

SCPnet Regional Resource Use and Emissions Database – Explanatory Document

This note provides documentation for the SCPnet resource use and emissions database *SCPnet Regional Resource Use and Emissions 2003.mdb*, prepared for SCPnet by Cambridge Econometrics, drawing on data from the Environment Agency Commercial and Industrial Waste Survey 2002/2003¹ and data provided by Netcen².

Indicators Data are provided for the following indicators:

- commercial and industrial waste arisings, by English region and sector, for 2002/03 (shown as ‘2003’ in the database)
- commercial and industrial waste arisings by English region and management route, for 2002/03 (shown as ‘2003’ in the database)
- energy use by English region, sector and fuel in 2003
- air emissions related to energy use by English region, sector and emissions type in 2003

In addition, the database also holds textual data on key strategies and projects, supported or funded by RDAs, to promote resource productivity under specific themes:

- business efficiency
- environmental technology
- waste management
- energy management
- sustainability

as published in Cambridge Econometrics (2006) *Assessing the Performance of England’s Regions in Promoting Sustainable Consumption and Production*³.

Organisation of the data in the database

The data are accessed by opening the following queries in the database:

ORGANISATION OF DATA IN THE DATABASE	
Indicator	Queries
Regional programmes and projects	qry Programmes
Commercial and industrial waste arisings, by English region and sector	qry RYW
Commercial and industrial waste arisings by English region and management route	qry RWD
Energy use by English region, sector and fuel	qry RFUJ
Air emissions related to energy use by English region, sector and emissions type	qry RFUEM
